JAMES F. KENNEY
Mayor

November 6, 2016

Dear Friends:

It is a pleasure and a privilege to welcome you to Philadelphia for the 7th annual *STEMtech* Conference, November 6-9, 2016. Philadelphia and its citizens keenly appreciate the importance of the STEM fields of Science, Technology, Engineering and Math in our City's development and we are making great strides in both STEM education enrichment and in the support available to our burgeoning tech industries. As such, we are proud to serve as the host city for this year's *STEMtech* Conference.

We commend the League for Innovation in the Community College (League), organizer of the Conference, for their 48 years of service to community college institutions across the country. Founded in 1968 by B. Lamar Johnson and a dozen community and technical college presidents, the League has sponsored more than 200 conferences, institutes, seminars, and workshops; published over 200 reports, monographs, periodicals, and books; led approximately 140 research and demonstrations projects; and provided numerous other resources and services to the community college field.

This year's conference will feature hundreds of special sessions, forums, roundtable discussions on advances in STEM and community college-specific issues. The conference tracks will examine learning analytics, advanced technology systems, learning management architecture, and advances in online learning. Additionally, speakers will explain how to use analytics to recruit, retain, and transition students. On the STEM side, attendees will explore advances in health, science, mathematics, energy, architecture, manufacturing, aerospace, and agriculture as well as the integration of STEM and the liberal arts.

We applaud the *STEMtech* Conference for providing an opportunity for professionals from a diverse range of backgrounds to connect and work together to better our world through STEM and education initiatives.

On behalf of the City of Philadelphia, I invite Conference participants to take some time out of their busy schedules to visit some of the City's unique landmarks of American history and enjoy Philadelphia's distinctive shopping and dining destinations.

We wish you a very successful and productive Conference and hope that you return again soon, and often.

Sincerely,

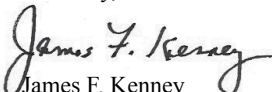

James F. Kenney
Mayor

SPECIAL SUPPORT

League for Innovation Corporate Partners play a central role in maintaining the technical sophistication of this event and sponsoring ongoing League activities. The League acknowledges and thanks the following organizations for their special support of the 2016 STEMtech Conference.

Ready when you are.™

(Booth 512)

Sponsor of the 24-Hour Wireless Hotspot

(Booth 306)

Sponsor of the Conference Notepads

(Booth 413)

Sponsor of Sunday's Reception in the Exhibition Hall

A higher degree. A higher purpose.

(Booth 412)

Sponsor of Monday's Coffee and Refreshment Break in the Exhibition Hall

FACULTY VOICES

(Booth 318)

Sponsor of the Conference Bags

The League also extends special thanks to the Philadelphia Marriott Downtown, GES, and AV Images for their assistance in making this conference a success.

STEERING COMMITTEE

STEMtech 2016 is produced with the efforts and support of individuals from Community College of Philadelphia, Atlantic Cape Community College, Bucks County Community College, Delaware County Community College, Reading Area Community College, and Rowan College at Burlington County. Our special thanks go to the many volunteers who provided assistance to create an exceptional conference experience.

EXHIBITORS

A fundamental feature of the STEMtech Conference is the exhibition of education- and technology-related products and services provided by League for Innovation **Corporate Partners** and **participating colleges**. These organizations are dedicated to serving the community college market and contributing to the success of this event. Participating exhibitors at this year's conference are described more fully in the Guide to the Exhibition, starting on page 38 of this program.

The Exhibition Hall is located in **Franklin Hall B, Level 4**.

GENERAL INFORMATION

ABOUT THE CONFERENCE

The League's *STEMtech* Conference brings you the best of STEM, analytics, big data, advanced technology, and learning management architecture. At *STEMtech*, college and university faculty members, K-12 teachers, administrators, government officials, and community and business representatives gather to celebrate, share, and explore research, best practices, and innovative ideas with their colleagues from around the world. We thank you for being part of this event.

All conference events take place at the Philadelphia Marriott Downtown, on levels 4 and 5 (maps on page 46).

Conference Tracks

- Learning Analytics
- Advanced Technology Systems and Learning Management Architecture
- Using Analytics to Recruit, Retain, and Transition Students
- Advances in E-Learning
- Health and Science
- Mathematics, Engineering, and Architecture
- Manufacturing, Energy, Aerospace, and Agriculture
- Integration of STEM and the Liberal Arts

Smoking is not permitted in any conference area.

CONFERENCE REGISTRATION

Pick up your conference materials and badge at the Conference Registration Desk (**Grand Ballroom Foyer, Level 5**). Your badge is your ticket to all conference activities, so please wear it whenever you are in the conference area.

Registration Hours

Sunday 11:00 AM - 4:30 PM

Monday 7:00 AM - 5:00 PM

Tuesday 7:00 AM - 5:00 PM

Lost and Found: Please turn in found items at the Conference Registration Desk. After the conference, items will be left with the Philadelphia Marriott Downtown loss prevention department.

SPEAKER SUPPORT

Presenters: After picking up your conference badge, please check in with Speaker Support (**Grand Ballroom Foyer, Level 5**) to confirm session details and to ask general questions regarding presentations.

Speaker Support Hours

Sunday 11:00 AM - 4:30 PM

Monday 7:00 AM - 5:00 PM

Tuesday 7:00 AM - 5:00 PM

HOTEL BUSINESS CENTER HOURS

Kinkos (lobby level) is open 24 hours a day.

LEAGUE ALLIANCE

League Alliance college employees are attending the conference at a discounted registration rate.

Learn more about membership benefits by visiting the League booth (#318) in the Exhibition Hall.

EXHIBITION HALL

STEMtech features an engaging exhibition of products and services provided by League for Innovation Corporate Partners. Visit with Partner representatives, network with colleagues, and enjoy light hors d'oeuvres, a brunch, coffee, or refreshments in the Exhibition Hall (**Franklin Hall B, Level 4**) during hall hours. The Guide to the Exhibition, which includes detailed exhibitor information, begins on page 38 of this program.

24-Hour Wireless Hotspot

Sponsored by  American Public APU University

Take advantage of the Wireless Hotspot (**Grand Ballroom Foyer, Level 5**) from 11:00 AM Sunday to 10:30 AM Wednesday. Network name: Stemtech2016; password: 2016league.

SOCIAL MEDIA

Get more out of your conference experience by staying connected with the League.

#16STPHILLY

MOBILE APP

The free *STEMtech* Conference app for iPhone and Android provides mobile access to the conference schedule, a complete list of sessions and exhibitors, and general conference information. The itinerary builder allows you to plan your personal conference agenda.

SECURITY/EMERGENCIES

Hotel security is available 24 hours a day. If you need to contact security, require first aid, or have an emergency, proceed to the nearest house phone and dial 51 for assistance.

RECORDING PRESENTATIONS

Video, photo, or audio recording of conference presentations is not permitted without the express written consent of the League, except by presenters who want to record their own sessions. The League reserves the rights to all recordings or reproductions at its conferences and meetings.

This logo identifies sessions being recorded for postconference on-demand viewing in iStream, the League's comprehensive, online resource bank for faculty, staff, and administrators. Visit the League booth (#318) to learn more about iStream.

Campus-Quality Labs for Online Students

Provide a rigorous lab experience with Carolina lab kits developed for college distance education. We offer more than 190 hands-on investigations that align with your course requirements in biology, anatomy and physiology, microbiology, chemistry, and physics. Visit our website to create your own Web course.

Community College Voices: Public Engagement Strategy Lab

Franklin 13, Level 4

Sponsored by Faculty Voices, a League for Innovation Initiative

Public Agenda's trainers will lead a collaborative workshop aimed at helping educators master strong, lasting, and authentic engagement. We will help you to develop practical skills for planning for a stronger engagement infrastructure at your community college. This training will give you the tools you need to work with students, faculty, and staff to improve student success, gather input on decisions, and improve faculty's ability to engage with administration. The format is not only informative, but also practical, including small and large group discussions, case studies, and interactive exercises. Nicole Hewitt, Senior Public Engagement Associate; Mattie Bennett-Caswell, Public Engagement Assistant, Public Agenda, NY

★ 11:00 AM - 4:30 PM

REGISTRATION

Grand Ballroom Foyer, Level 5

SPECIAL SESSION

Mathematics, Engineering, and Architecture

CSM and REC Foundation: Achieving VEXcellence Through Robotics Competition

Franklin 2, Level 4

Learn how VEX U college competition provides engineering, computer science, and other students real-life engineering challenges. Get tips on recruiting, funding, mentoring, and community outreach. Student-centered learning and team approaches are emphasized. Visit us in booth #113 for hands-on robotic activities.

Bernice Brezina, Interim Chair, Business and Technology; Ronda Jacobs, Area Coordinator, Information Technology; William Luyster, Professor, Math, Physics, and Engineering; Byron Brezina, Professor, Math, Physics, and Engineering, College of Southern Maryland, MD; Jim Crane, Director, Regional Operations, Robotics Education & Competition Foundation, TX

FORUMS

Using Analytics to Recruit, Retain, and Transition Students

Academic Coaching: Leveraging Analytics for Improved Retention, Persistence, and Completion

Franklin 1, Level 4

Come learn how academic coaching helps you maximize analytics regarding students' likeliness to persist and graduate. Participants will explore strategies and tools to help students deepen self-awareness, clarify values, and commit to success.

Maureen Breeze, Senior Vice President, LifeBound, CO

Advances in E-Learning

CCC and OSB Implement Courses Using HoloLens Mixed Reality Technology

Franklin 4, Level 4

As a result of a Microsoft grant to develop curriculum using HoloLens mixed reality technology, Clackamas Community College student teams created an interactive 3D model of an automotive transmission at Oregon Story Board's custom computer lab. A limited number of participants will be selected for a hands-on HoloLens demonstration. Visit us in booth #209 for more hands-on opportunities.

Shelley Midthun, Executive Director, Oregon Story Board, OR; Thomas Wester, Instructor, HoloLens, Clackamas Community College, OR

Mathematics, Engineering, and Architecture

Modular Math in Action

Franklin 3, Level 4

In this forum, we will develop modules for a college technical math course, create a framework for a modular math program, and compare your plans with an existing modular system.

Michael Delgaty, Coordinator, Mathematics, Applied Science, and Environmental Technology, Algonquin College, ON, Canada

Influence incoming **STUDENT SUCCESS** with the *SuccessNavigator*® assessment

The *SuccessNavigator*® assessment gives you a **holistic view** of the critical factors that most greatly influence incoming student success — academic skills, commitment, self-management and social support — so you can **identify at-risk students, deliver detailed action plans** and **improve first-year retention rates**.

This 30-minute self-administered online assessment is **EASY to implement** and will give you the specific data you need to:

- ✓ Easily identify and reach at-risk students whose personal challenges go unreported in standardized academic tests.
- ✓ Prioritize your resources more strategically because you have a complete understanding of what students need.
- ✓ Effectively guide students to success using individualized reports with detailed action plans and resources.

Improve retention and completion rates
as early as your next incoming class

Learning Analytics

Fail Fast to Succeed

Franklin 2, Level 4

Lone Star College will share how using student success data to take action—measuring impact quickly, accurately, and honestly—is key to preventing initiative fatigue from spiraling into exhaustion. Some initiatives worked and others fell flat.

Michael Chavez, Vice President, Student Success; Deirdre Hayes-Cootz, Director, DEDP Grant; Juan Lebron, Counselor, Math, Lone Star College System, TX

FORUMS

Learning Analytics

Online Science Courses Without Sacrificing the Hands-On Component

415, Level 4

In this session, participants will actively take part in hands-on lab investigations developed for online science courses. These investigations have been designed for the off-campus setting while maintaining college-level rigor.

Matthew Steadman, Specialist, Distance Learning, Carolina Biological Supply, NC

Using Analytics to Recruit, Retain, and Transition Students

Solving Two Common E-Learning Problems: Student Retention and Proctoring Process Management

409, Level 4

E-learning leaders and faculty will learn how to boost retention by measuring noncognitive indicators of success, and how to better manage the proctoring process.

Julie Owen, Chief Sales and Marketing Officer, SmarterServices, AL

Advances in E-Learning

Academic Coaching: Strategies for Improving Student Success in E-Learning

408, Level 4

In this session, faculty and administrators experience coaching as a powerful human architecture to enhance online learning. Through demonstrations and activities, participants explore strategies for integrating coaching into online learning environments.

Maureen Breeze, Senior Vice President, LifeBound, CO

Using Snagit to Communicate Quickly and Effectively in the Classroom

412, Level 4

Learn how you can use TechSmith's Snagit to communicate more effectively with students and colleagues. We will explore a few real-world examples, and demonstrate some workflows that you can apply right away.

Ryan Eash, Manager, Customer Success, TechSmith, MI

The Internet of Things: New Cybersecurity Frontier

414, Level 4

The Internet of Things (IoT) is a technology phenomenon comprised of over a billion smart, interconnected sensors that gives unexplored access to everything. This presentation explores some opportunities and threats in the IoT world.

Daniel Benjamin, Dean, STEM; Chuck Pfeifer, Associate Vice President, Educational Partnerships, American Public University System, WV

Mathematics, Engineering, and Architecture

Engineering Design and 3D Printing Camp for Secondary Students

410, Level 4

Secondary students experimented with 3D printing technology and parametric modeling software at an Ivy Tech camp. Students engaged in design challenges, learned technical skills, and heard from industry leaders using 3D printing and scanning.

Geoff Knowles, Executive Director, Crawfordsville Campus, Ivy Tech Community College, IN

Health and Science

How to Use Simulation Technology in an Educationally Sound Way

411, Level 4

Is medical simulation equipment on your campus creating outcomes that enhance student learning? This presentation is designed for administrators and faculty to walk away with practical interactive ideas using simulation technology that improves clinical preparedness.

Terry Kinzel, Director; Andrea Elliott, Director, SIM Tech; Jennifer deLeon, Activity Coordinator, Title V, Big Bend Community College, WA

Monday

★ 8:00 - 9:00 AM [continued]

Innovative Active Learning Techniques That Encourage Engaging, Authentic Student Inquiry
413, Level 4

Presenters will host a dialogue about innovative ways in which faculty use active learning techniques, course-based research experiences, and project-based learning to encourage engaging, authentic inquiry by students throughout the science curriculum.

Peter Williams, Dean, STEM; Amanda Crochet, Professor, Chemistry, Clark College, WA; Josephine Pino, Faculty, Bioscience Technology, Portland Community College, OR

Retention Programming for Minority STEM Students at Community College of Philadelphia
407, Level 4

Learn how federal grant dollars, analytics, and faculty and administrative supports were leveraged to increase retention of African-American and Latino STEM students. Faculty and administrators will benefit from this interactive session.

Linda Powell, Professor and Department Head, Biology, Community College of Philadelphia, PA

ROUNDTABLE DISCUSSIONS

All Roundtable Discussions take place in Franklin 1, Level 4.

Learning Analytics

Improving Student Learning Outcomes Through Data Analytics

Success involves the collection and analysis of data. A wide variety of sources can improve outcomes through a continuous improvement cycle. Faculty, designers, and administrators will learn how to drive change through data analysis.

Constance St. Germain, Executive Dean, Humanities and Sciences; Ruth Veloria, Executive Dean, Business, University of Phoenix, AZ

Advanced Technology Systems and Learning Management Architecture

Discussion of the NSF Advanced Technological Education Program

The Advanced Technological Education program at the National Science Foundation focuses on technician education for high-technology fields in STEM. A Program Officer will discuss the program and answer questions from attendees regarding potential proposals.

Thomas Higgins, Program Officer, Division of Undergraduate Education, National Science Foundation, VA

Using Analytics to Recruit, Retain, and Transition Students

Preparing and Retaining Students in STEM Gateway Courses

Discuss how Supplemental Instruction and pre-semester sessions help underprepared students in challenging STEM gateway courses.

David Burger, Instructor, Mathematics; Dennis Reer, Director, STEM; Gonzalo Perez, Executive Assistant to the President; Anjali Thanawala, Coordinator, STEM, Passaic County Community College, NJ

Health and Science

Using 3D Print Technology in the Mortuary Sciences

Participants from any discipline will enjoy learning how one instructor's research with 3D technology helped overcome a common impediment to restorative art, and will be challenged to consider its use in their own domain.

Jeff Caldwell, Professor, Funeral Service Education, Humber College Institute of Technology and Advanced Learning, ON, Canada

When Greening Meets Liberal Arts: A Socratic Approach

Brookdale's The Innovation Network (TIN) projects give education a refreshing new feel. Students find engaging in multidisciplinary project teams to solve real problems a better way of learning, which has a positive effect on retention and completion rates.

Tom Berke, Professor, Chemistry; Katherine Edward, Director, Assessment; Deborah Mura, Professor, Journalism; Juliette Goulet, Professor, Environmental Science; Lana Leonard, Team Leader, The Innovation Network, Brookdale Community College, NJ

★ 9:15 - 10:15 AM

SPECIAL SESSION

Manufacturing, Energy, Aerospace, and Agriculture

Engaging Industry in Your Programs

Franklin 2, Level 4

Learn how San Jacinto College used the development of a new Center for Petrochemical, Energy, and Technology to deepen industry partnerships. Share what's working at your college.

Allatia Harris, Vice Chancellor, Strategic Initiatives, San Jacinto College District, TX; Jeffrey Parks, Dean, Industrial and Applied Technology; Van Wigginton, Provost, San Jacinto College - Central Campus, TX; Randall Boeding, Independent Consultant, R. Boeding Group, LLC, TX

FORUMS

Advanced Technology Systems and Learning Management Architecture

The Essentials of Building a Successful Community of Practice

412, Level 4

A National NSF Center that leads a community of practice of 50+ colleges and universities will show attendees five best practices for growing and managing engaged groups.

Ann Beheler, Principal Investigator, Emerging Technology Grants, Collin College, TX

Using Analytics to Recruit, Retain, and Transition Students

STEM: Preparing for the College and Career Transition

413, Level 4

In 2016, ACT Student Score Reports will include a STEM benchmark for the first time. Please join the discussion as we critique the impact of the benchmark on student awareness and preparation.

Kristie Fisher, Assistant Vice President, Client Relations, ACT, Inc., IA

Fostering Curiosity and Discovery in Chemistry and Biology Laboratories

415, Level 4

Experience how two community college science faculty members enhanced the laboratory experiences of students enrolled in Principles of Chemistry and Principles of Biology. Both courses are entry level courses for non-STEM majors.

Noel Gardner, Instructor, Chemistry, and Chair, Natural Science; Stephanie Burks, Instructor, Biology, Hinds Community College, MS

Creating an Online Orientation That Speaks to Students

407, Level 4

Your campus has worked hard to offer classes and programs at flexible times. Why shouldn't your orientation do the same? This session will walk participants through Go2Orientation—an online orientation solution.

Valerie Kiesel, CEO, Innovative Educators, CO

Integration of STEM and the Liberal Arts

STEM Meets the Liberal Arts: Creating Community Through Service Learning

409, Level 4

Brainstorm creative ways to collaborate with faculty across liberal arts and STEM disciplines to create projects for Sinclair students that foster a passion for learning about and serving the community.

Jacqueline Housel, Associate Professor, Geography; Adrienne Cassel, Professor, English, Sinclair Community College, OH

Integrate Reading, Writing, and the Arts Into STEM Education

410, Level 4

Students traditionally consider the mandatory general education science course as a major hurdle in their education. Participants will explore how interactive notebooks seamlessly integrate reading and writing into a course on physics in the arts.

Martina Bachlechner, Professor, Business Aviation and Technology, Pierpont Community and Technical College, WV

Health and Science

Baccalaureate Education at the Community College: Creating Dual Admission Partnerships

414, Level 4

Learn how community college and university nursing programs collaborated to create a seamless dual admission baccalaureate program to meet workforce needs. Discover a process to replicate on your campus and within your discipline.

Jennifer Eccles, Director, Nursing, Century College, MN

How to Build Your Very Own Biomedical Equipment Technology Program

411, Level 4

“One of the 5 best jobs you’ve never heard of” is how *Money Magazine* described Biomedical Equipment Technology. Learn about the field and program. Join the discussion about recruitment, mentoring, and supporting industry instructors.

Randy Libros, Associate Professor, Electronics Engineering Technology; Tammy Wooten, Chair, Chemistry; Mozghan Bahadory, Adjunct Professor, Chemistry, Community College of Philadelphia, PA

ROUNDTABLE DISCUSSIONS

All Roundtable Discussions take place in Franklin 1, Level 4.

Advanced Technology Systems and Learning Management Architecture

Simulation Software as a Prime Motivator for STEM Engagement

Participants will discuss and share experiences related to various types of simulation applications in order to baseline how these tools impact STEM outcomes and engagement.

Ken Scott, Senior Instructor, CIS, H. Councill Trenholm State Community College, AL

Using Analytics to Recruit, Retain, and Transition Students

Strategies to Success: STEM Scholarship Programs for All Levels

Discuss the effectiveness of the Believe in Ohio program at the high school, the Choose Ohio First program at the two-year college, and the Bridges to Success program at the four-year college level.

Geza Varhegyi, Assistant Professor; Ormond Brathwaite, Associate Dean, STEM, Cuyahoga Community College - Western Campus, OH

Mathematics, Engineering, and Architecture

Integrating Fundamental Mathematics Principles Into an Engineering Technology Course

This session examines how a mathematics course in the engineering technology (ET) department at a community college integrated fundamental mathematics principles into a credit-bearing introductory ET mathematics course.

Tara Donahue, Managing Evaluator, McREL International, CO

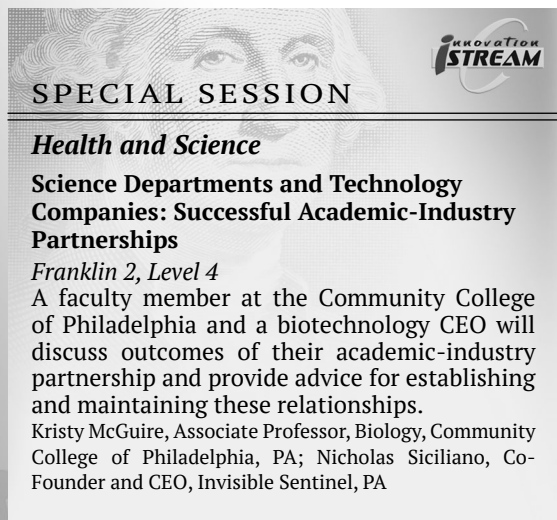

Health and Science

Integrating Technology Skills Into Healthcare Career Training

Discuss how LaGuardia Community College engages employer partners to create technology skills inventories and integrates these skills into healthcare training. Participants share experiences integrating technology into the classroom and brainstorm how to overcome challenges.

Kimberly Kendall, Executive Director, Adult and Continuing Education; Chandana Mahadeswaraswamy, Director, Career and Professional Programs, LaGuardia Community College - CUNY, NY

★ 10:30 - 11:30 AM

SPECIAL SESSION

Health and Science

Science Departments and Technology Companies: Successful Academic-Industry Partnerships

Franklin 2, Level 4

A faculty member at the Community College of Philadelphia and a biotechnology CEO will discuss outcomes of their academic-industry partnership and provide advice for establishing and maintaining these relationships.

Kristy McGuire, Associate Professor, Biology, Community College of Philadelphia, PA; Nicholas Siciliano, Co-Founder and CEO, Invisible Sentinel, PA

FORUMS

Creating Faculty Personas for a Variety of Survey Analysis Measurements

408, Level 4

Segmenting faculty or students into personas allows for learning organizations to effectively discover what these customers believe is needed to engage them in the most memorable customer experience, thus leading to educational advocates. Participants are encouraged to bring their laptops.

Erik Bean, Research Fellow, Advanced Studies, University of Phoenix, MI

Expanding Opportunity for All: How Can We Increase Community College Student Completion?

410, Level 4

Learn how a Choicework tool developed by Public Agenda for the League for Innovation's Faculty Voices Project can be used on your campus to engage faculty—and others—in important conversations about student success and completion, and how the talk can lead to meaningful action to improve student retention and completion at your institution.

Arlen Arnsperger, Consultant, Arnsperger Consulting, CO; Allatia Harris, Vice Chancellor, San Jacinto College District, TX; Cynthia Wilson, Vice President, Learning and Research, League for Innovation in the Community College, AZ

Advanced Technology Systems and Learning Management Architecture

Virtual Campus Project: A Wayfinding and Visualization System for Campuses

413, Level 4

The Institute for New Media Studies worked with St. Cloud Technical and Community College to create an interactive, virtual, reality-based navigation system for college campuses that is engaging and entertaining in productive ways.

Gordon Carlson, Director, Institute for New Media Studies, Fort Hays State University, KS; Joyce Helens, President; Viola Bergquist, CIO, St. Cloud Technical and Community College, MN

Advances in E-Learning

Create Instructional Videos With Camtasia in 3, 2, 1

412, Level 4

Get started creating instructional videos for your students. We will walk through a sample Camtasia video project from start to finish, and discuss best use cases for utilizing video in the classroom.

Ryan Eash, Manager, Customer Success, TechSmith, MI

Monday

★ 10:30 - 11:30 AM [continued]

It Works: Leveraging Adaptive Learning Technology to Drive Student Success

411, Level 4

Discover how adaptive learning is utilized to drive student success in a science course. Discuss how adaptive learning can be used to increase students' self-efficacy in a science course.

Christina Garcia, Program Administrator, General Education and Psychology; Sylvia Nemmers, Lead Faculty, Sciences, Colorado Technical University, IL

Developing Possibilities in a Correctional Environment

414, Level 4

Learn how Sinclair Community College overcomes institutional obstacles such as lack of internet connectivity to create an atmosphere in which students use technology to enhance learning and prepare for release.

Cheryl Taylor, Coordinator, Advanced Job Training; Kevin Bryan, Supervisor, SCI Site, Criminal Justice Sciences, Sinclair Community College, OH

Providing Professional Development 24/7: Restructuring How We Deliver Training

407, Level 4

It's time to do more with less. Learn innovative and cost-effective strategies that will help your department provide ongoing professional development anytime, anywhere.

Erica Kennon, Associate Director, External Relations, Innovative Educators, CO

Health and Science

Developing a Great Program: Planning Your Ideal Allied Health Facility

409, Level 4

Explore the elements to building an ideal facility, from programming through design. Participants will work together to develop the program for a facility and, then, see the result of the planning and design process.

Michele Pollio, Senior Lab Planner and Associate, HERA Laboratory Planners, MO; Deborah Hardy, Associate Provost and Dean, Health Technologies, Lakeland Community College, OH; Allison Edmonds, Lab Planner, Architecture, HERA Laboratory Planners, PA

Build a Strong Lymphatic System With Anatomy in Clay

415, Level 4

Using a living skeletal model, students gain knowledge of the lymphatic system and breast cancer awareness by visually, and kinesthetically, building these systems with clay. Build stronger anatomy students with STEM practices.

Teri Fleming, Educator, Life Sciences, Anatomy in Clay Learning System, CO

ROUNDTABLE DISCUSSIONS

All Roundtable Discussions take place in Franklin 1, Level 4.

Advances in E-Learning

To the LMS and Beyond: Library Instruction in Online Classrooms

As online classes increase, what is the role of library instruction? How can libraries reach students who may never visit campus? This discussion will cover current strategies, invite other ideas, and examine potential challenges.

Diana Matthews, Associate Professor and Librarian; Scott Tarbox, Professor and Librarian, Santa Fe College, FL

Mathematics, Engineering, and Architecture

Teaching Software Engineering Using Data Science

Involve students hands-on in big data from available public datasets and the Internet of Things. Using relational and noSQL databases, along with Python, R, and statistics, help your students increase skills and marketability.

Gerald Reed, Professor, Computer Programming, Valencia College, FL

Integration of STEM and the Liberal Arts

Career Research Project Combines Technical Skills With Liberal Arts

Add purposeful writing to a STEM course. Students research STEM careers and evaluate alternatives using an IT tool. Our research paper assignment stresses effective Internet searches, personal productivity tools, and using an evaluation matrix.

Sally Sullivan, Professor, CIS, Prince George's Community College, MD

Health and Science

Launching the Queensborough Public Health Program for the 21st Century

Responding to the booming public health sector and the growing need for trained professionals, we present the launch of the Queensborough Public Health Program. This session discusses the program design, development, and implementation processes.

Anuradha Srivastava, Assistant Professor, Biological Sciences and Geology; Andrea Salis, Assistant Professor, Health, Physical Education, and Dance, Queensborough Community College - CUNY, NY

★ 11:30 AM - 1:00 PM

COFFEE AND REFRESHMENT BREAK

Advanced Technology Systems and Learning Management Architecture

Best Practices to Maximize Your Business Relationships and Benefit Students

Franklin 2, Level 4

Give students an edge in qualifying for jobs by developing an actively engaged group of business partners and maximizing those relationships through trends discussions, skills validations, virtual internships, and student mentoring.

Ann Beheler, Principal Investigator, Emerging Technology Grants, Collin College, TX

FORUMS

Learning Analytics

Better Than Natives: Powerful and Successful College Transfer

408, Level 4

The presentation will describe how our community college students within and outside of the university partnership are outperforming native students. Measures include GPA, persistence, and graduation. Discussion will focus on scalability.

John Crooks, Associate Provost, University Partnership, Lorain County Community College, OH

Using Analytics to Recruit, Retain, and Transition Students

STEM GIRLS: Inspiring the Next Generation

413, Level 4

Join a discussion about the low representation of females in STEM fields, an event designed to inspire local girls to pursue STEM careers using fun and educational workshops, and a practical guide to starting your own.

Andrew Wright, Assistant Professor, Mathematics; Abreeotta Williams, Assistant Professor, Biology, Columbia State Community College, TN

Advances in E-Learning

Online Teaching: The Nuts and Bolts

414, Level 4

Online delivery is used in middle schools through graduate programs. Why are some programs successful and others not? This session focuses on online postsecondary education and nuts and bolts from development to delivery.

Steve Canipe, Program Director, The Richard W. Riley College of Education and Leadership, Walden University, MN

A Hybrid Flipped Classroom With Advanced Communications

410, Level 4

Video lecture has become cost effective and can be adapted to increase the success rate of students. Through the use of WebEX conferencing, students have the access to the instructor that is so desired.

Debbie Lozano, Professor, Engineering, Lakeland Community College, OH

Advancements in Rubric Creation for Online Courses

411, Level 4

The cubic model for rubric creation blends three levels of Bloom's taxonomy with dynamic metacriteria content. The result is a three-dimensional rubric model that is easy to use.

Andrew Hurd, Director, Faculty Program, Cybersecurity; Michael Johnson, Interim Associate Dean, Technology, Excelsior College, NY

Manufacturing, Energy, Aerospace, and Agriculture

Changing Manufacturing and Welding Perceptions at Northeast Wisconsin Technical College

415, Level 4

The NSF ATE Welding: Wisconsin's Ultimate Rural STEM Pathway project is improving perceptions through high school articulation, industry tours, contextualized math curriculum, and instructor training. Be ready for a math activity and interactive video.

Rachel Johnson, Instructor, Mathematics, Northeast Wisconsin Technical College, WI

Integration of STEM and the Liberal Arts

STEM Goes to Brazil and London

409, Level 4

Learn how you can develop engaging study abroad programs in the STEM fields. This session will show how technology can be utilized to enhance learning abroad. Bring your smartphone.

Heith Hennel, Professor, IT, Valencia College, FL

Monday

ADVANCE YOUR CAREER IN STEM EDUCATION

At Walden, a National Council for Accreditation of Teacher Education (NCATE)–accredited institution, we share your commitment to STEM education and preparing students for the future. In The Richard W. Riley College of Education and Leadership, educators at all levels share best practices to improve student outcomes in science, technology, engineering, and math.

Whether you are looking to further your studies at the bachelor's, master's, post-master's, or doctoral level, choose a degree or certificate program to help you:

- Discover the latest and most effective ways to use technology in your teaching.
- Explore innovative teaching methods designed to help students succeed.
- Participate in a highly sophisticated learning environment that includes mobile technology for on-the-go learning and options to tailor learning to your schedule.

**Visit us at Booth 412 and talk with a representative
to learn more about Walden.**

The Richard W. Riley
College of Education and Leadership

WALDEN UNIVERSITY

Walden University is accredited by the National Council for Accreditation of Teacher Education (NCATE). This accreditation covers initial teacher preparation programs and advanced educator preparation programs. As a recognized standard of excellence in professional education for the preparation of teachers, administrators, and other preK–12 school professionals, NCATE accreditation ensures that the institution has met rigorous national standards set by the profession and members of the public. However, the accreditation does not include individual education courses offered to preK–12 educators for professional development, relicensure, or other purposes.

Five Tips for Creating Engaging Instructional Videos With Camtasia

414, Level 4

This session will explore five tips that you can apply to your instructional videos to improve engagement. Take your Camtasia videos to the next level with little effort, and look like a pro.

Ryan Eash, Manager, Customer Success, TechSmith, MI

Creating Engaging and Interactive Content for STEM Classes

413, Level 4

Visualizing and practicing are key to learning mathematics, but many resources are not engaging or interactive. What makes online content good, what type and/or level of interaction is necessary, and what tools exist to help?

Louise Krmptic, Senior Director, Digital Content, Maplesoft, ON, Canada

Clearing the Math Hurdle on the STEM Path

411, Level 4

Targeted and personalized math review can accelerate students into credit-bearing courses. Learn how colleges are adapting the award-winning EdReady application to support new models for transitioning students into college and career pathways.

Bryan Arvison, Manager, Regional Membership, The NROC Project, CA; Connie Calandrino, Director, Academic Foundations Mathematics, Hudson County Community College, NJ; Randi Eisen, Math Coach and Navigator, Title III-iPowers, Camden College, NJ

Manufacturing, Energy, Aerospace, and Agriculture

Advancing Industrial Manufacturing on Campus Through Training, Education, and Entrepreneurism

415, Level 4

Participants will learn how LaGuardia Community College developed an industrial manufacturing program that supports career pathways for students and connects industry certifications, noncredit to credit linkages, experiential learning, employer partnerships, and entrepreneurship.

Francesca Fiore, Assistant Dean, Workforce Development and Business Services, LaGuardia Community College - CUNY, NY

Integration of STEM and the Liberal Arts

SETTO: A Model for Identifying STEM Career Paths

409, Level 4

Explore a proposed model to effectively differentiate five STEM career types: scientist, engineer, technologies, technician, and operator (SETTO). Topics will include criteria, usage, and implementation of the model.

Pennsylvania Wu, Professor, CIS, Cypress College, CA

Tuesday

★ 9:15 - 10:15 AM [continued]

Sustainability as a Framework for Integrating STEM and Liberal Arts

407, Level 4

Sustainable development may require technology, but has political, economic, and cultural facets as well. This framework was applied during a Tanzania study abroad program and can be utilized in more conventional classroom settings.

Randy Libros, Associate Professor, Electronics Engineering Technology; Boi-Lucia Gbaya-Kanga, Assistant Professor, English, Community College of Philadelphia, PA

Health and Science

Create Successful Community Educational Initiatives in Health and Science

410, Level 4

Develop an informed, engaged populace by embedding personal and social responsibility as core elements of a 21st century education in critical thought and problem solving. Engage in interdisciplinary curricular experiences in health and science.

Jo Duncan, Director, Center of Excellence for Science; Solomon Nfor, Assistant Professor, Natural Sciences, St. Philip's College, TX

POSTER SESSIONS

All Poster Sessions take place in Franklin Hall Prefunction.

Mathematics, Engineering, and Architecture

Readiness Module for Improving Student Success in Online College Algebra

Online college algebra students at Anne Arundel Community College (AACC) must complete a readiness module before starting the course. Learn about AACC's innovative approach to educate students about course rigor, test skills, and advisement.

Stacey Nicholls, Associate Professor; Alycia Marshall, Chair; Kathy Hays, Associate Professor, Mathematics, Anne Arundel Community College, MD

Creating an Autonomous Unmanned Surface Vessel

Learn how undergraduate students used the engineering design process to make a small vessel for shallow water research by utilizing a 3D printer, microcontroller, sonar, GPS, environmental monitoring sensors, and manufacturing equipment. Catherine Walker, Assistant Professor, Mathematics; William Labby, Program Coordinator, Industrial Technology, Leeward Community College, HI

Health and Science

NBC2 Presents a Comprehensive Industry-Endorsed Biomanufacturing Curriculum

NBC2 is dedicated to educating and training a workforce for the biomanufacturing industry. Curriculum units align with 10 technician jobs and contain the knowledge, hands-on training, and documentation required for each job.

Linda Rehfuss, Associate Professor, Science and Technology, Bucks County Community College, PA; Margaret Bryans, Assistant Professor, Biotechnology, Montgomery County Community College, PA

Mathematics, Engineering, and Architecture

Ensuring STEM Transfer Student Success

Franklin 2, Level 4

Local community colleges joined forces with University of Maryland Baltimore County to promote success for transfer STEM students. This presentation highlights the work of the mathematics team to facilitate degree completion through institutional collaborations.

Robyn Toman, Professor, Mathematics, Anne Arundel Community College, MD; Raji Baradwaj, Senior Lecturer, Statistics, University of Maryland - Baltimore County, MD

FORUMS

Learning Analytics

Evidence of Academia in Crisis

408, Level 4

This session will illustrate how the claim of academia in crisis is established while discussing some dominant factors initiated from our sociocultural context that are continuing to contribute to this crisis.

Amir Salehi, Associate Professor, Philosophy, Community College of Baltimore County, MD

Using Analytics to Recruit, Retain, and Transition Students

Helping Students See Their Potential Through STEM Engagement

412, Level 4

Learn how SCTCC engages underperforming high school students through STEM, helping students realize their college potential. The session will include lessons learned, partnering with school districts, tips on creating a program, and a tool kit.

Joyce Helens, President; Mark Gucinski, Instructor, Math, Science, and Technology; Jeremy Reisinger, Instructor, Chemistry; Tarryl Clark, Dean, Sciences, Technology, and Math, St. Cloud Technical and Community College, MN

Analyzing Hawai'i Pathways: Middle School to STEM Career

410, Level 4

University of Hawai'i has developed STEM pathways to promote student success from K-12 to career. Participants will explore key metrics such as completion rates, time to degree, and workforce outcomes through analytics in this session.

Tiffany Tsang, Outreach Specialist, STEM, University of Hawai'i, HI

Advances in E-Learning

Maintaining Professionalism in Social Media

413, Level 4

In the world of social media, everything is posted for the world to see. Learn how to remain professional on your social media platforms, as well as tips to share with students.

Megan Biller, Communications Specialist, Doctorate in Community College Leadership, Ferris State University, MI

FYE for Two-Year Colleges: Flipping and Customizing Student Services

411, Level 4

Colleges are recognizing that first-year experience (FYE) programs should be accessible, ongoing resources. We will explore online, customizable tools as an ongoing solution to promote student success.

Kristen Seldon, Director, Institutional Relations, Innovative Educators, CO

Newton's Bench: Physics Laboratories for the 21st Century

407, Level 4

Newton's Bench is a system containing a hardware kit with videos which allows students to perform physics experiments at home and eliminates the equipment bottleneck in today's physics laboratories.

Gregory Perugini, Professor, STEM, Rowan College at Burlington County, NJ

Mathematics, Engineering, and Architecture

Maximizing Student and Faculty Success Through Professional Collaboration

409, Level 4

Learn how professional learning communities transformed the educational process for mathematics faculty and students. See how you, too, may dramatically increase student success with data analysis, peer observations, and consistent assessments.

Wesley Spinks, Chair; Sandra Morrissey, Instructor; Cassonda Thompson, Instructor, Mathematics, York Technical College, SC

Academic Summer Camps Lead to Student Success

415, Level 4

This interactive presentation will not only demonstrate how to start a math (science, English) camp, but will provide and engage instructors with innovative tools in the form of games and activities. Learning on any level can be fun, and we can prove it.

Ken Rand, Director, Math Academy, Hartnell College, CA

Integration of STEM and the Liberal Arts

Communication Educators

414, Level 4

With the widespread practice of brevity using social media, should STEM educators take on the responsibility of teaching how to express complete thoughts and healthy face-to-face interactions?

Avery Austin, Adjunct Professor, Physics, Northern Virginia Community College, VA

POSTER SESSIONS

All Poster Sessions take place in Franklin Hall Prefunction.

Learning Analytics

Student Perceptions: Outstanding Online Instruction

Positive and negative perceptions of online instruction from over 1,500 online students in the United States and Canada are presented. Gender, ethnicity, and age differences are considered.

Donald Orso, Professor; Joan Doolittle, Professor, Psychology, Anne Arundel Community College, MD

★ 11:30 AM - 12:30 PM [continued]

Advances in E-Learning

E-Learning in the General Education

Classroom: Technology Enriched Flipping

Faculty will discuss creative strategies for improved learning in general education classrooms within a technology-rich environment. Receive sample lessons, see room design ideas, and view results from our flipped, technology-enhanced classroom pilots.

Jennifer Seat, Instructor, Mathematics; Rhonda Gregory, Director, Distributed Education; Melva Black, Instructor, Communications, Volunteer State Community College, TN

Manufacturing, Energy, Aerospace, and Agriculture

High Altitude Balloon STEMs

Engineering and science students designed and assembled a balloon payload from conception to launch to retrieval to data analysis. Other radio-tracked data opportunities are in Earth sciences, meteorology, aerospace, and oceanography.

Robert Neil, Instructor; Charles Goodman, Instructor, Math and Physics, Pitt Community College, NC

★ 12:45 - 1:45 PM

SPECIAL SESSION

Integration of STEM and the Liberal Arts

Women in STEM: A Civic Issue With an Interdisciplinary Approach

Franklin 2, Level 4

LaGuardia Community College takes an interdisciplinary approach to addressing the problem of fewer women graduating with STEM degrees. We will share our strategies for raising awareness around opportunities that exist for all majors in technology fields.

Seema Shah, Director, Technology and Innovation, LaGuardia Community College - CUNY, NY

FORUMS

Advanced Technology Systems and Learning Management Architecture

The What, How, and Why of Infrastructure as a Service

413, Level 4

With the improvement of bandwidth and spread of virtualization, more and more institutions, organizations, and businesses are turning to infrastructure as a service. This session will provide a live demonstration of IaaS.

John Sands, Principle Investigator, CSSIA; Bill Wolfe, Faculty, Computer Integrated Technologies, Moraine Valley Community College, IL

Using Analytics to Recruit, Retain, and Transition Students

The Invisible STEM Student: Early Identification, Community Building, and Success

412, Level 4

Community colleges do not know enough about their STEM students for early placement into pathways. We discuss early STEM student identification solutions implemented at our campus as part of the NSF-funded RiSE project.

Tom Fleming, Professor, Physics; Pat Burnett, Chair, Engineering, Edmonds Community College, WA

Advances in E-Learning

Five Ways to Build Your Own Animated GIFs Into Instruction

414, Level 4

Animated GIFs are not just for fun and games. This session will explore five different ways you can use animated GIFs in your lessons to engage and enhance learning.

Ryan Eash, Manager, Customer Success, TechSmith, MI

**An Interactive Approach to Developing Faculty:
The Teaching Circle**

415, Level 4

Teaching Circles is an approach to faculty development that creates small group discussions on a focused topic chosen by faculty, and is designed to share best practices. The discussion is followed by a publication on lessons learned.

Francesca Catalano, Associate Dean, Math, Science, and Engineering, Kankakee Community College, IL; Daniel Benjamin, Dean, STEM, American Public University System, WV

**Revolutionizing Annual Performance
Summaries and Promotion**

411, Level 4

The presenters will describe and display a program that has allowed evaluation in a paperless format. Attendees will see how they can save hours and improve their summary and promotion displays.

Jonathan Grimes, Professor, Psychology; Todd Abramovitz, Professor, SAIT, Community College of Baltimore County, MD

Mathematics, Engineering, and Architecture

**Tried and True Instructional Techniques in
Teaching Mathematics**

410, Level 4

This presentation will explore engaging methods in teaching developmental and college-level mathematics topics such as finding absolute value, converting logarithmic expressions to exponential form, and finding derivative of trig functions.

Fred Katiraie, Professor, Mathematics, Montgomery College, MD

Integration of STEM and the Liberal Arts

**Demonstrating Interdisciplinary Commonalities
via Venn Diagrams**

409, Level 4

Through hands-on activities, explore Caesar ciphers and the bubonic plague from the combined perspectives of math, history, and computing. Described in Venn diagrams, activities reflect all or any two of the disciplines.

Kathleen Tamerlano, Associate Professor, Business and Technology; Mary Hovanec, Assistant Professor, History; Kristin Egan, Assistant Professor, Math, Cuyahoga Community College - Western Campus, OH

**Top 10 Reasons to Consider AP Computer
Science Principles**

407, Level 4

The first AP Computer Science Principles exam will be administered in 2017. Is your college prepared? Should we offer a similar course for all students? Registration, curriculum, and computer science department members will benefit.

Arta Szathmary, Professor Emeritus, STEM, Bucks County Community College, PA

POSTER SESSIONS

All Poster Sessions take place in Franklin Hall Prefunction.

Advances in E-Learning

Targeted Math Review for Career Pathways

Returning to college for new credentials often requires learners to refresh their math skills. Discover an online tool for targeted review that can help retain student focus on their chosen career path.

Ben Jacobs, Implementation Specialist, Member Support, The NROC Project, CA

Mathematics, Engineering, and Architecture

**Creating Alternative Learning Strategies for
Transfer Engineering Programs**

Strengthen community college engineering transfer programs using alternative classroom strategies including online lectures and labs, flipped instruction, and emporium classroom models to improve student success and enhance student access to engineering courses.

Amelito Enriquez, Professor, Mathematics, Cañada College, CA

Integration of STEM and the Liberal Arts

**NSF Programs in the Division of Undergraduate
Education**

The National Science Foundation has several programs that support undergraduate education. This poster will highlight the four major programs in the Division of Undergraduate Education.

Thomas Higgins, Program Officer, Division of Undergraduate Education, National Science Foundation, VA

Leadership Academy: Best Practices and Essential Tools for Faculty

413, Level 4

Develop faculty to perform at the next level through a leadership academy. Maximize business relationships, communicate with peers, integrate soft skills into the classroom, and manage time more efficiently.

Ann Beheler, Principal Investigator, Emerging Technology Grants, Collin College, TX

Using Analytics to Recruit, Retain, and Transition Students

Pre-College Cohort Model: Success Through a Summer Academy Program

412, Level 4

Learn how a STEM summer academy model will build community college enrollment and a successful first-year experience.

Anjali Thanawala, Coordinator, STEM; Gonzalo Perez, Executive Assistant to the President; Dennis Reer, Director, STEM; David Burger, Instructor, Mathematics, Passaic County Community College, NJ

Advances in E-Learning

Making Connections: LINCing New Technology to Engage Students

408, Level 4

Explore award-winning techniques to engage students with adaptive content that will allow them to be actively engaged in the classroom. Explore how LINCing two classes in the STEM field can benefit students.

Heith Hennel, Professor; Gerald Hensel, Professor, IT, Valencia College, FL

Blackboard Assessment: Is It on the Test?

415, Level 4

With so many Web resources available, online assessment has become more difficult. In this session, the presenter will share strategies and tips for student engagement, assessment, and retention using the features of Blackboard Learn.

Marie Hartlein, Associate Professor, CIS, Montgomery County Community College, PA

Providing Hands-On Activities and Opportunities in Online Classes

409, Level 4

Faculty participants will learn how to incorporate hands-on activities and opportunities to gain real-world experience into online courses. Participants will be assisted in developing similar opportunities in their courses and programs.

Denise Pheils, Professor and Fellow, National Cybersecurity Institute, DC

Mathematics, Engineering, and Architecture

Math: Reducing Anxiety and Increasing Student Success

411, Level 4

Math preparedness is a national crisis. The University of Phoenix created curriculum incorporating foundational content into credit-bearing courses. The session will benefit faculty by sharing best practices in instructional design and learning.

Constance St. Germain, Executive Dean, Humanities and Sciences; Jennifer Fletcher, Program Dean, General Education; Jessica Philipp, Academic Dean, Humanities and Sciences, University of Phoenix, AZ

Teaching Mathematics to Millennials

410, Level 4

Teaching millennials any subject can be challenging. It is even more challenging to teach mathematics. This presentation will share teaching techniques and strategies designed to keep millennials engaged in the classroom.

Amit Dave, Faculty, Mathematics; Cornell Grant, Instructor, General Studies, Georgia Piedmont Technical College, GA

VEX U Robotics Teams: Recruitment, Graduation, and Beyond

414, Level 4

Increase STEM student enrollment by promoting a philosophy of engineering problem-solving from elementary to high school. Community outreach, recruiting, funding, and a competitive petition process for robotics team participation will be discussed.

Bernice Brezina, Interim Chair, Business and Technology, Ronda Jacobs, Area Coordinator, Information Technology; William Luyster, Professor, Math, Physics, and Engineering; Byron Brezina, Professor, Math, Physics, and Engineering, College of Southern Maryland, MD; Jim Crane, Director, Regional Operations, Robotics Education & Competition Foundation, TX

Health and Science

Engaging Students Through Exploration of 3D Printing Techniques

407, Level 4

Three dimensional printing is a dynamic field that is utilized widely in industry, and is becoming increasingly popular as an educational tool. This session highlights this widely implemented industry practice utilizing low cost techniques.

Christine Delahanty, Associate Professor, Engineering, Bucks County Community College, PA

POSTER SESSIONS

All Poster Sessions take place in Franklin Hall Prefunction.

Integration of STEM and the Liberal Arts

Integration of Research and Writing Into the STEM Curriculum

This session will include evidence of increased student retention and self-efficacy, as well as a significant increase in ACS scores. Rubrics for evaluation of student writing and presentations will be shared.

Lorelei Wood, Residential Faculty, Chemistry, Chandler-Gilbert Community College, AZ

Of Mice and STEM

Bounded by minimum accreditation standards and maximum state-mandated degree credits, CapTechU innovates to infuse the arts into STEM. Ranging from History of Technology to Electronic Music, we attest to the symbiotic nature of STEAM education.

Helen Barker, Dean, Academics; Claude Rankin, Chair, Business and Liberal Arts, Capitol Technology University, MD

Health and Science

Mathematics Competency Through Dimensional Analysis for Nursing Chemistry Students

Mathematics competency in pre-nursing education is critical. To build competency, we present a variation of dimensional analysis for nursing chemistry and assessment of student performance. This session is for math or science instructors.

Leonard Anagho, Assistant Professor, Chemistry, Georgia Gwinnett College, GA

Community College Week

THE INDEPENDENT VOICE COVERING COMMUNITY, TECHNICAL AND JUNIOR COLLEGES, SINCE 1988

BOOTH 307

Community College Week (CCW) and ccweek.com, published by Autumn Publishing, provide the only independent voice for faculty, administrators, and associations at the nation's 1,200 community, technical, and junior colleges. Nearly 26,000 readers turn to CCW in print and online for information they trust on subjects ranging from funding to the impact of developments unfolding in Washington. In CCW's 26 annual issues, readers find POVs from leaders on issues critical to higher education, statistics and data, and news unavailable from other sources. They keep ahead of trends, dangers, and opportunities in the ever-evolving technology world, not only through updates in regular editions, but also in twice-yearly supplements offering educators the chance to benefit from case studies at other institutions. Since 1988, CCW has been the free press publication of record, providing coverage exclusively about community colleges. News and topics may change, but CCW's commitment to higher education never will.

BOOTH 319

The League for Innovation in the Community College (League) is an international nonprofit organization with a mission to cultivate innovation in the community college environment.

Founded in 1968 by B. Lamar Johnson and a dozen U.S. community and technical college presidents, the League has proudly served community college institutions for almost five decades. Through these years, the League has sponsored more than 200 conferences, institutes, seminars, and workshops; published over 200 reports, monographs, periodicals, and books; led approximately 140 research and demonstration projects; and provided numerous other resources and services to the community college field.

CEOs from 18 of the most influential, resourceful, and dynamic community colleges and districts in the world comprise the League's board of directors and provide strategic direction for its ongoing activities. These community colleges and their leaders are joined by almost 500 institutions that hold membership in the League Alliance.

With this core of powerful and innovative community colleges and 100 corporate partners, the League continues to fulfill its mission through conferences and institutes; online resources; research; and projects and initiatives with member colleges, corporate partners, government agencies, and private foundations in support of student and institutional success.

League activities and initiatives center on essential topics for community colleges, including diversity, equity, and inclusion; information technology; leadership development; learning and student success; research and practice; and workforce development.

GOLD CORPORATE PARTNERS

CompTIA[®]

BOOTH 213

The goal of the **CompTIA** Academy Partner Program is to provide valuable tools and resources to assist schools in recruiting, training, certifying, and upgrading the skills of their students. IT careers start with the right education, and research has shown that certified employees have superior communication skills and are better able to understand new or complex technologies. CompTIA's Academy Program is designed to help schools promote certification and enhance student career opportunities. The program is open to high schools (including career or technical centers), degree granting colleges and universities, and not-for-profit/501(c)3 organizations that provide technology instruction.

EXCELSIOR COLLEGE[®]

BOOTH 312

Excelsior College is a regionally accredited, nonprofit distance learning institution that focuses on removing obstacles to the educational goals of adult learners. Founded in 1971 and located in Albany, NY, Excelsior is a proven leader in the assessment and validation of student knowledge. It offers more efficient and affordable access to degree completion through multiple avenues: its own online courses and college-level proficiency examinations, and the acceptance in transfer of credit from other colleges and universities as well as recognized corporate and military training programs.

FERRIS STATE UNIVERSITY

Doctorate in Community
College Leadership

BOOTH 309

The **Ferris State University** Doctorate in Community College Leadership develops leaders of mission-driven, 21st century community colleges. Taught by experienced, high-level community college leaders, this program prepares leaders for the changing environments in higher education through real-world problems and cases. This blended program requires minimal onsite time. A key feature is that the dissertation is integrated throughout with a goal of having individuals complete it by the end of the three-year program.

Operate robots, play interactive games, and participate in challenges at the **College of Southern Maryland** booth. Robots designed and built with the popular classroom robotics platforms VEX EDR and VEX IQ will be available for hands-on activities. This year's new collegiate VEX U game is Starstruck. This is a fast-paced spectator game. Teams score points by scoring stars and cubes in scoring zones or hanging their robot on a hanging bar. Practice manipulating a robotic arm or drive a real-life military EOD robot. Challenge opponents in a game of freeze-tag or in the VEX IQ game, Crossover.
