

Success Stories: Cuyahoga Community College

Tri-C has seen an increase in enrollment since utilizing Walmart Brighter Futures 2.0 Project funds to award training scholarships for middle-skills training such as: healthcare, manufacturing and welding, and public safety. Industry recognized certifications are offered through these training programs.

Improved communication with program partners led to a Tri-C site visit coordinated by Job Link Services to showcase workforce training programs to clients of partnering agencies. Each client shared their career aspirations, thus allowing Tri-C program managers to speak directly to individuals about program opportunities. Discussions are underway to possibility offer site visits to program partners on a monthly basis.
